Computer Science
SILABO

Universidad Católica San Pablo
2021-I

CS370. Big Data (Mandatory)

1. General information

1.1 School	:	Ciencia de la Computación
1.2 Course	:	CS370. Big Data
1.3 Semester	:	9^{no} Semestre.
1.4 Prerrequisites	:	
		• CS272. Databases II. (5^{th} Sem)
		• CS3P1. Parallel and Distributed Computing . (8^{th} Sem)
1.5 Type of course	:	Mandatory
1.6 Learning modality	:	Virtual
1.7 Horas	:	1 HT; 2 HP; 2 HL;
1.8 Credits	:	3

2. Professors

3. Course foundation

Nowadays, knowing scalable approaches to processing and storing large volumes of information (terabytes, petabytes and even exabytes) is fundamental in computer science courses. Every day, every hour, every minute generates a large amount of information which needs to be processed, stored, analyzed.

4. Summary

1. Introducción a Big Data 2. Hadoop 3. Procesamiento de Grafos en larga escala

5. Generales Goals

- That the student is able to create parallel applications to process large volumes of information
- That the student is able to compare the alternatives for the processing of big data
- That the student is able to propose architectures for a scalable application

6. Contribution to Outcomes

This discipline contributes to the achievement of the following outcomes:

a) An ability to apply knowledge of mathematics, science. (**Usage**)

b) An ability to design and conduct experiments, as well as to analyze and interpret data. (**Usage**)

i) An ability to use the techniques, skills, and modern computing tools necessary for computing practice. (**Usage**)

j) Apply the mathematical basis, principles of algorithms and the theory of Computer Science in the modeling and design of computational systems in such a way as to demonstrate understanding of the equilibrium points involved in the chosen option. (**Usage**)

7. Content

UNIT 1: Introducción a Big Data (15)	
Competences: a,b,i	
Content	**Generales Goals**
• Overview on Cloud Computing • Distributed File System Overview • Overview of the MapReduce programming model	• Explain the concept of Cloud Computing from the point of view of Big Data[Familiarity] • Explain the concept of Distributed File System [Familiarity] • Explain the concept of the MapReduce programming model[Familiarity]
Readings: Coulouris et al. (2011)	

UNIT 2: Hadoop (15)	
Competences: a,b,i	
Content	**Generales Goals**
• Hadoop overview. • History. • Hadoop Structure. • HDFS, Hadoop Distributed File System. • Programming Model MapReduce	• Understand and explain the Hadoop suite [Familiarity] • Implement solutions using the MapReduce programming model. [Usage] • Understand how data is saved in the HDFS. [Familiarity]
Readings: Hwang, Dongarra, and Fox (2011), Buyya, Vecchiola, and Selvi (2013)	

UNIT 3: Procesamiento de Grafos en larga escala (10)	
Competences: a,b,i	
Content	**Generales Goals**
• Pregel: A System for Large-scale Graph Processing. • Distributed GraphLab: A Framework for Machine Learning and Data Mining in the Cloud. • Apache Giraph is an iterative graph processing system built for high scalability.	• Understand and explain the architecture of the Pregel project. [Familiarity] • Understand the GraphLab project architecture. [Familiarity] • Understand the architecture of the Giraph project. [Familiarity] • Implement solutions using Pregel, GraphLab or Giraph. [Usage]
Readings: Low et al. (2012), Malewicz et al. (2010), Baluja et al. (2008)	

8. Methodology
El profesor del curso presentará clases teóricas de los temas señalados en el programa propiciando la intervención de los alumnos. El profesor del curso presentará demostraciones para fundamentar clases teóricas. El profesor y los alumnos realizarán prácticas Los alumnos deberán asistir a clase habiendo leído lo que el profesor va a presentar. De esta manera se facilitará la comprensión y los estudiantes estarán en mejores condiciones de hacer consultas en clase.

9. Assessment
Continuous Assessment 1 : 20 % **Partial Exam** : 30 % **Continuous Assessment 2** : 20 % **Final exam** : 30 %
